Pride and Progress

Celebrating your home learning successes— well done!

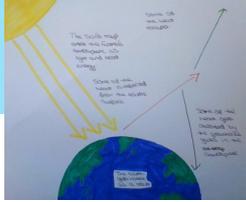

Dear Boris Johnson,

I am writing about the impact global warming is having on our planet and what we need to do to reduce it. This is a problem that needs to be solved.

Global warming is destroying our planet. Ice caps are melting which leave polar bears stranded and crops destroyed. More than 8 million tons of plastic are dumped into our oceans every year. Over one million marine animals die a year because of us- because of the all plastic that we have polluted our oceans with. This is not okay, and we need to do something about it. We can increase plastic bags in supermarkets to 30p. We can ban single- use plastic at large events like concerts and festivals. We can increase the price of petrol making people less likely to use their cars. We can ban straws and have plastic free isles in supermarkets. There are many things that we can do to reduce plastic pollution and global warming. I hope you take some of my ideas into consideration.

Your sincerely,
Bethan
